- Responsive design

EDUCATION

Bachelor of Engineering in Computer And Information Systems   **2023-2027**
NED University of Engineering And Technology

O/A Levels   **2019-2023**
The City School

CERTIFICATIONS & ACHIEVEMENTS

- **Intermediate Python** from Data Camp
- **JavaScript for Beginners - The Complete introduction to JS** from Udemy
- **3rd Position** in Qubit coding competition .

PROJECTS

- **Movie Explorer:** A dynamic movie website built with HTML, CSS, Tailwind CSS, and JavaScript, integrated with the MovieDB API for an engaging user experience.

- **Smart Shopping Cart App:** An interactive GUI-based shopping app developed with Python Tkinter, featuring a range of tools to enhance the shopping experience.

- **Crypto Tracker:** Crypto Tracker is a full-stack app built with React, Node.js, Express, and MongoDB. It provides real-time cryptocurrency price tracking, a global crypto map, and trip planning suggestions based on the user's crypto balance. The app integrates external APIs to fetch cryptocurrency data and offers personalized travel options based on the user's funds.
